

CLASSIC ADRENALIN RACING FUEL

Special fuel for racing

Description/Application

CLASSIC ADRENALIN RACING FUEL is an unleaded, oxygenated fuel, that has a three-digit octane level suitable for a broad spectrum of racing applications.

The special formulation guaranteed a reliable fuel that provides an increase in performance across many different applications. **CLASSIC ADRENALIN RACING FUEL** corresponds to the highest quality standards of performance and can also be used at all levels of motorsport from professional to amateur as the fuel is both FIA and Motorsport UK compliant.

Properties

- not over-enrichment of the mixture due to oxygen enrichment
- high knock resistance

Product data

Properties	Unit	RACING FUEL *
Colour		colorless
Density 15 °C	g/cm ³	0.756
Octance number		101.4
Engine octane rating		87,7
Dry vapor pressure equivalence	psi	8.3
Oxygen content m/m	%	3.4

*are average values and may vary within the framework of the standard.
